## CARIBBEAN DRUG PREVENTION, TREATMENT, REHABILITATION, AND GANG AND YOUTH VIOLENCE FOCUSED INSTITUTIONS

Results of an Institutional Mapping Exercise of the  
OAS Caribbean English-Speaking Member States  
for the CICAD/OAS Training and Certification  
Program (PROCCER)-Caribbean

April 2012

## The Training and Certification Program (PROCCER)

Effective action on the issues of drug abuse and gang violence in the Caribbean, is hampered by the lack of properly trained and certified frontline personnel. An innovative program, now being implemented throughout the Caribbean by the Demand Reduction section of the Inter-American Drug Abuse Control Commission (CICAD), of the Secretariat for Multidimensional Security (SMS), of the Organization of American States (OAS) is helping to remedy this problem. The Training and Certification Program (PROCCER) was designed to develop and strengthen OAS member state institutions, public policies, and strategies regarding prevention, treatment and rehabilitation for individuals with problems stemming from drug abuse and violence.

The objective of the program is to contribute to optimizing the quality of care in prevention, treatment and rehabilitation of drug abuse and dependence and drug-related violence. This will be accomplished in working with both governmental and non-governmental front line organizations that provide drug abuse and violence prevention, treatment and rehabilitation services that target people suffering from drug abuse and/or dependence and their families, as well as other high-risk populations.

The PROCCER Caribbean initiative, launched in May 2011, not only targets drug treatment and rehabilitation service providers, but also those working in the area of drug prevention. Additionally, PROCCER Caribbean is being adapted, developed, and implemented on a regional level, while meeting country-specific needs and capacities. This is the first PROCCER initiative to include a drug prevention component and be implemented on a regional level.

The regional approach adopted by PROCCER-Caribbean fosters harmonization of human resources in drug prevention, treatment, and rehabilitation throughout the region. This approach calls for:

- § A regional Mapping exercise to identify the key stakeholder agencies in-country;
- § A Regional training needs assessment to identify specific priority needs and capacity across the Region;
- § The development of Regional standards and competencies
  - ü Development of the prevention curriculum;
  - ü Adaptation of PROCCER treatment curriculum;
- § The delivery of competency-based training courses in prevention and treatment counseling, therapy techniques, and management skills to service providers;
- § The establishment of a regional certification board for professionalization of prevention, treatment, and rehabilitation service providers;
- § The implementation of Internet-based information management and patient tracking systems;
- § The collaboration with Regional political and technical organizations;
  - ü CARICOM, CANTA; and
- § The collaboration with Regional academic institutions:
  - ü The University of the West Indies, St. George's University.

This Directory shares the results of the initial regional mapping activity.

## **Directory of Caribbean Drug Prevention, Treatment, Rehabilitation, and Gang and Youth Violence Focused Institutions**

The Directory of drug prevention, treatment, rehabilitation, and gang and youth violence focused institutions in the English-Speaking Caribbean was compiled from the results of an agency mapping exercise conducted for the CICAD/OAS Training and Certification Program (PROCCER).

The directory involved the data gathering from PROCCER Point Persons of thirteen OAS member states, through a Diagnostic Regional Coordinator. The coordinator was also responsible for ensuring that the various datasets were cleaned, performed any necessary data analysis, and drafted the initial report.

The PROCCER Point Persons were directly appointed by the national authorities from 13 OAS member states of the Caribbean and are professionals from the national drug councils, government ministries, government organizations and non-governmental organizations. The Point Persons assist in performing project-related activities and representing their countries, as they are considered specialists in the area of drug demand reduction.

The PROCCER Program operates through the Demand Reduction Section and under the authority of the Inter-American Drug Abuse Control Commission (CICAD), of the Secretariat for Multidimensional Security (SMS), of the Organization of American States (OAS).

Funding for PROCCER Caribbean comes from the Bureau of International Narcotics and Law Enforcement Affairs (INL) of the United States Department of State; and the Anti-Crime Capacity Building Program (ACCBP) of the Foreign Affairs and International Trade, Government of Canada.
